

Pest Compliance Map

Every pest control requirement on this reference, in one place: what the authority requires, the record that shows it was met, how often, and who the text names as responsible. It covers the federal detention standards and the jail pest provisions of 30 states. Set your facility's profile and the map keeps only the authorities that reach it. Print it, download it as a PDF checklist, or export it as a spreadsheet.

This map lists what each authority's text requires and the record that would show it. It is not a determination that any facility complies, and it is not legal advice. Which authorities govern a facility is set by its jurisdiction, its operator, and its agreements. Every requirement links to the authority page that quotes the source.
